❖ PROJECT NARRATIVES

INTRODUCTION

Welcome to my Professional Growth Portfolio. This portfolio represents my journey as an Information Technology student, highlighting the knowledge technical skills, professional values, and experiences I have gained throughout my studies at Ensign College. It demonstrates my commitment to lifelong learning, ethical decision-making, and continuous improvement as I prepare for a career in Information Technology.

Throughout my academic journey, I have developed practical experience in cloud computing, system administration, networking, cybersecurity, virtualization, and technical support. My coursework has allowed me to apply theoretical concepts to real-world scenarios using technologies such as Microsoft Azure, Windows Server, Linux, Microsoft Entra ID, Docker, VirtualBox, VMware, SQL Server, Cisco Packet Tracer, and Wazuh Security Information and Event Management (SIEM).

In addition to technical development, my education has strengthened my professional character. I strive to approach every project with integrity, accountability, respect, and a desire to serve others. I believe that technical competence and strong moral values work together to create trustworthy IT professionals who positively influence their organizations and communities.

This portfolio showcases significant projects that demonstrate both my technical abilities and my personal growth. Each project reflects lessons learned through planning, problem-solving, collaboration, and ethical decision-making. Together, they illustrate my preparation for a career as an IT professional dedicated to providing secure, reliable, and innovative technology solutions.

SUMMARY

I am an aspiring Information Technology professional with a strong interest in cloud computing, systems administration, technical support, cybersecurity, and enterprise infrastructure. My education has equipped me with practical experience implementing and supporting modern IT solutions using Microsoft Azure, Windows Server, Linux, virtualization platforms, networking technologies, and cloud services.

I enjoy solving technical problems, learning emerging technologies, and helping users successfully adopt technology. My goal is to build a career where I can contribute to secure, scalable, and reliable IT environments while continually expanding my knowledge through professional certifications and hands-on experience.

I value teamwork, honesty, accountability, adaptability, and continuous learning. These values guide my professional decisions and help me build positive relationships with colleagues and clients.

RÉSUMÉ IMPROVEMENTS

Career Objective

To obtain a challenging Information Technology position where I can apply my knowledge of cloud computing, systems administration, technical support, and cybersecurity while continuing to develop professionally through practical experience, collaboration, and lifelong learning.

Technical Skills

- Cloud Computing
- Operating Systems
- Networking
- Virtualization
- Cybersecurity
- Productivity Tools
- Database Technologies

TECHNICAL SKILLS

CLOUD COMPUTING

- Microsoft Azure
- Azure Storage
- Microsoft Entra ID
- Azure Virtual Networks
- Azure Virtual Machines
- Azure Role-Based Access
- Azure Monitor
- Azure Backup

OPERATING SYSTEMS

- Windows 10
- Windows 11
- Windows Server
- Ubuntu Linux

NETWORKING

- TCP/IP
- DNS
- DHCP
- VLANs
- Routing and Switching
- Cisco Packet Tracer
- Network Troubleshooting

TECHNICAL SKILLS

VIRTUALIZATION

- VMware Workstation
- Oracle VirtualBox
- Docker
- Windows Subsystem for Linux

CYBERSECURITY

- Wazuh SIEM
- Vulnerability Assessment
- Security Monitoring
- Identity and Access Management
- Least Privilege Access Control

DATABASE TECHNOLOGIES

- Microsoft SQL Server
- SQL Server Management Studio

PRODUCTIVITY TOOLS

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Microsoft Teams
- GitHub
- Visual Studio Code

PROFESSIONAL STRENGTHS

STRONG ANALYTICAL
AND TROUBLESHOOTING
SKILLS

EXCELLENT PROBLEM-
SOLVING ABILITIES

ADAPTABLE AND EAGER TO LEARN
NEW TECHNOLOGIES

EFFECTIVE WRITTEN AND
VERBAL
COMMUNICATION

TEAM COLLABORATION
AND LEADERSHIP

TIME MANAGEMENT AND
ORGANIZATION

COMMITMENT TO
ETHICAL CONDUCT

CONTINUOUS
IMPROVEMENT MINDSET

SIGNIFICANT PROJECTS

MICROSOFT AZURE INFRASTRUCTURE DEPLOYMENT

One of the most significant projects I completed involved designing and implementing a cloud infrastructure using Microsoft Azure. The project required creating resource groups, configuring Microsoft Entra ID users and groups, provisioning Azure Storage resources, assigning role-based access permissions, and preparing the environment for virtual machine deployment. A major challenge involved understanding Azure governance policies and selecting supported deployment regions after policy restrictions prevented initial deployments. I learned how Azure Policies enforce organizational compliance and how proper planning helps avoid deployment failures. This project strengthened my understanding of cloud infrastructure, identity management, storage security, and least-privilege access. It also reinforced the importance of documentation, planning, and collaboration when deploying enterprise cloud resources.

Skills demonstrated:
Azure Administration
Microsoft Entra ID
Azure Storage

UBUNTU LINUX FILE SERVER IMPLEMENTATION

During my Linux coursework, I designed and configured an Ubuntu File Server capable of securely sharing organizational files across multiple users. The project involved configuring user permissions, managing directories, implementing file-sharing services, and securing access using Linux permissions.

One challenge was balancing accessibility with security. I learned that proper permission management protects sensitive organizational data while ensuring authorized users can perform their work efficiently.

The project expanded my Linux administration skills while reinforcing the importance of secure system configuration and careful planning.

Skills demonstrated:

Linux Administration

File Permissions

System Security

User Management

Troubleshooting

SECURITY MONITORING WITH WAZUH SIEM

Another valuable project involved deploying and configuring the Wazuh Security Information and Event Management platform. The project required installing the Wazuh Manager, deploying monitoring agents, and analyzing security events collected from monitored systems.

This project deepened my understanding of cybersecurity operations by demonstrating how centralized logging, threat detection, and continuous monitoring improve organizational security. I also learned that security technologies are only effective when combined with sound policies, responsible administration, and continuous monitoring.

Skills demonstrated:

- Cybersecurity
- SIEM Deployment
- Security Monitoring
- Threat Detection
- Incident Analysis

GROWTH REFLECTION

Looking back on my academic journey, I recognize tremendous growth in both my technical abilities and my confidence as an IT professional. Each project challenged me to think critically, solve complex problems, and remain persistent when obstacles arose. Rather than viewing difficulties as failures, I learned to see them as opportunities to develop resilience and improve my technical expertise.

My Azure cloud projects strengthened my understanding of enterprise infrastructure, while my Linux and cybersecurity projects reinforced the importance of security, reliability, and ethical responsibility. These experiences have prepared me to contribute effectively within professional IT teams.

As technology continues to evolve, I remain committed to lifelong learning through certifications, hands-on practice, and professional development. My goal is not simply to build technical expertise but also to become a trusted IT professional whose integrity, service, and commitment positively impact every organization I serve.

FUTURE PROFESSIONAL GOALS

Over the next several years, I intend to:

Earn Microsoft Azure Administrator (AZ-104) certification.

Obtain CompTIA Security+ certification.

Gain professional experience in cloud administration or technical support.

Continue developing expertise in cybersecurity and cloud infrastructure.

Pursue leadership opportunities that allow me to mentor others.

Use technology to improve organizational efficiency while maintaining the highest ethical standards.

I believe that continuous learning, integrity, service, and dedication will enable me to become a highly skilled Information Technology professional capable of making meaningful contributions throughout my career.
